Login = mobile number only (no OTP / no password). Type the mobile number from the tables below on the login screen and you are in â€" the app matches the number and auto-logs you in from this machine's network. Doctors see the doctor console; patient users see the patient dashboard. **Data lives in MongoDB Atlas (permanent)** â€" seeded once through the real public API by `server/seed-test-data.mjs` (idempotent, safe to re-run; it never deletes or modifies records it did not create).

7	`6ad91f18575fd67ca02cfdbe`	Amit Patil `9822000103`	Sunita Patil	`MH31AB1103`	General emergency	Dr. Aarav Sharma â†' **Dr. Kabir Nair** referral note: "In OT, you handle"	REFERRED (OPEN)	â€" left open on purpose so the referral flow can be demoed â€"

â˜… **Live referral demo:** log in as **Dr. Kabir Nair â€" mobile 9822000005**. The open emergency for **Sunita Patil** (raised by Amit Patil / 9822000103) shows the banner **"REFERRED TO YOU by Dr. Aarav Sharma"** with the note *"In OT, you handle"*. It is deliberately **not approved and not resolved** â€" the referring doctor (Dr. Aarav Sharma, 9822000001) sees it as "Referred to Dr Kabir Nair". Resolving or cancelling it removes the demo, so re-run `node seed-test-data.mjs` (from `server/`) to restore it.
